

Science - Progression of Knowledge

ANIMALS INCLUDING HUMANS	F2	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5	YEAR 6
	<p>Describe what they see, hear and feel while they are outside</p> <p>Explore the natural world around them.</p> <p>Recognise some environments that are different from the one in which they live</p> <p>Know and talk about the different factors that support their overall health and wellbeing: - regular physical activity - healthy eating - tooth brushing - sensible amounts of 'screen time' - having a good sleep routine - being a safe pedestrian</p> <p><u>ELG</u></p> <p>Manage their own basic hygiene and personal needs, including dressing, going to the toilet and understanding the importance of healthy food choices.</p> <p>Explore the natural world around them, making observations and drawing pictures of animals and plants.</p> <p>Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.</p>	<p><u>Types of animals</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals; • identify and name a variety of common animals that are carnivores, herbivores and omnivores; <p><u>Parts of animals</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets); • identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. 	<p><u>Feeding and exercise</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • find out about and describe the basic needs of animals, including humans, for survival (water, food and air); • describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene. <p><u>Living things</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • notice that animals, including humans, have offspring which grow into adults; 	<p><u>Movement and feeding</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat; • identify that humans and some other animals have skeletons and muscles for support, protection and movement. 	<p><u>Human nutrition</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • describe the simple function of the basic parts of the digestive system in humans; • identify the different types of teeth in humans and their simple functions; <p><u>Food chains</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • construct and interpret a variety of food chains, identifying producers, predators and prey. 	<p><u>Life cycles</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • describe the changes as humans develop to old age. 	<p><u>Our bodies</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood; • recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function; • describe the ways in which nutrients and water are transported within animals, including humans.

Science - Progression of Knowledge

PLANTS	<p>Describe what they see, hear and feel while they are outside</p> <p>Explore the natural world around them.</p> <p>Recognise some environments that are different from the one in which they live</p> <p><u>ELG</u></p> <p>Explore the natural world around them, making observations and drawing pictures of animals and plants.</p> <p>Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.</p>	<p><u>Plants</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none">• identify and name a variety of common wild and garden plants, including deciduous and evergreen trees;• identify and describe the basic structure of a variety of common flowering plants, including trees.	<p><u>Growing plants</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none">• observe and describe how seeds and bulbs grow into mature plants;• find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	<p><u>What plants need</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none">• explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. <p><u>Parts of a plant</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none">• identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers;• investigate the way in which water is transported within plants;• explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.	
	<p>EYFS – Y3 Observe plants throughout the year.</p>				

Science - Progression of Knowledge

LIVING THINGS AND THEIR HABITATS	<p>Explore the natural world around them</p> <p>Recognise some environments that are different from the one in which they live</p> <p><u>ELG</u></p> <p>Explore the natural world around them, making observations and drawing pictures of animals and plants.</p> <p>Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.</p>	<div> <div>Observe animals in the local environment throughout the year.</div> <div></div> </div>	<p><u>Habitats</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • explore and compare the differences between things that are living, dead, and things that have never been alive; • identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other. • identify and name a variety of plants and animals in their habitats, including microhabitats <p><u>Feeding</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food. 		<p><u>Grouping living things</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • recognise that living things can be grouped in a variety of ways; • explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment; <p><u>Danger to living things</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • recognise that environments can change and that this can sometimes pose dangers to living things. 	<p><u>Life cycles</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird; • describe the life process of reproduction in some plants and animals. 	<p><u>Classifying living things</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals; • give reasons for classifying plants and animals based on specific characteristics.

Science - Progression of Knowledge

EVOLUTION AND INHERITANCE							<u>Evolution and inheritance</u> <i>Links to Y3 rocks and soils/Animals inc Humans</i>
							Pupils should be taught to: <ul style="list-style-type: none">• recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago;• recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents;• identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.

Science - Progression of Knowledge

	F2	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5	YEAR 6
FORCES	Explore the natural world around them.			<u>Magnets and forces</u> Pupils should be taught to: <ul style="list-style-type: none"> • compare how things move on different surfaces; • notice that some forces need contact between 2 objects, but magnetic forces can act at a distance; • observe how magnets attract or repel each other and attract some materials and not others; • compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials; • describe magnets as having 2 poles; • predict whether 2 magnets will attract or repel each other, depending on which poles are facing. 		<u>Forces</u> Pupils should be taught to: <ul style="list-style-type: none"> • explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object; • identify the effects of air resistance, water resistance and friction, that act between moving surfaces; • recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect. 	

Science - Progression of Knowledge

LIGHT	Explore the natural world around them.			<p><u>Light and shadows</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • recognise that they need light in order to see things and that dark is the absence of light; • notice that light is reflected from surfaces; • recognise that light from the sun can be dangerous and that there are ways to protect their eyes; • recognise that shadows are formed when the light from a light source is blocked by an opaque object; • find patterns in the way that the size of shadows change. 			<p><u>Light and sight</u></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • recognise that light appears to travel in straight lines; • use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye; • explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes; • use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

Science - Progression of Knowledge

SOUND	Explore the natural world around them.			<u>Sound</u> Pupils should be taught to: <ul style="list-style-type: none">• identify how sounds are made, associating some of them with something vibrating;• recognise that vibrations from sounds travel through a medium to the ear;• find patterns between the pitch of a sound and features of the object that produced it;• find patterns between the volume of a sound and the strength of the vibrations that produced it;• recognise that sounds get fainter as the distance from the sound source increases.			
-------	--	--	--	---	--	--	--

Science - Progression of Knowledge

ELECTRICITY					<p><u>Electricity</u> Pupils should be taught to:</p> <ul style="list-style-type: none"> • identify common appliances that run on electricity; • construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers; • identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery; • recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit; • recognise some common conductors and insulators, and associate metals with being good conductors. 		<p><u>Changing circuits</u> Pupils should be taught to:</p> <ul style="list-style-type: none"> • associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit; • compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches; • use recognised symbols when representing a simple circuit in a diagram.
